SU JOK ACADEMY

- The second volume of the “Onnuri Auricular Therapy” three volume series by Prof. Park Jae Woo discusses the theoretical tenets of the auricular systems correspondence to the internal organs and part of the human body. The detailed auricular projections of the internal organs make it possible to determine – with the utmost precision – on the floor of the auricle the most active point correspondence to certain regions or areas in the organs and tissues, thus by far enhancing the sought-after selectivity and efficacy of the therapy applied. - Having recourse to the hands – feet auricular projections has specifically contributed to unifying the auricles correspondence systems and the hands-feet correspondence systems with in the framework of the single energy Homo-systems of the human body - The “Onnuri Auricular Therapy” series is intended for use by the acupuncture specialists, as well as medical specialists in a variety of clinical fields, and a broad readership taking interest in successful practices of alternative medicine.
