- The book "Onnuri Head Correspondence System" is a detailed review of the human body correspondence system contained in the head's skin, facial muscles, skull bond, brain. Their totality forms the homo-system of the head which includes, in particular, correspondence systems of the face, nose, tongue, lips, eyebrows, scalp, irises, etc. Consideration of the principles of organization of the head's Homo-system and mechanisms underlying energy interrelationships between various structural and functional elements of the human body allows to have deep insight into the process that are under way there, and also opens up new possibilities for diagnosis and treatment of diseases. - The book is meant for acupuncturists, general practitioners specializing in various fields of medicine, for biologists, philosophers, practitioners of alternative medicine, students of natural and medical sciences.
